

Taz Little is a solutions-focused Senior Executive with more than 25 years of success across the military, energy, IT, retail, logistics, distribution, and telecom sectors. Leveraging extensive experience as an IT professional with specialized knowledge in network security and operating system optimization, he is an asset for companies working on transforming old technology to new technology, digital transformation, systematic planning, roadmaps and execution for the next stage of profitability, or on boosting underperforming sales. His broad areas of expertise include logistics, innovation, leadership, scalability, enterprise network deployment, IT, system integration, team building, and drone operations.

As CEO & cofounder of AINautics, he leads the startup company in providing educational and consulting. He has recently started a project at AINautics to merge IT with drone technology, where he is responsible for all aspects of Drone operations, planning, deployment, and research. This follows an impressive record in the military.

Taz has studied at ECPI and Liberty University and holds a Degree in Cyber & Network Security, served a total of twenty-six years between the US Army and Marines. He is also an FAA certified remote pilot (Part 107), Instructor certification, and multiple credentials in other industries.
